Working Group 4
More Resources for At-risk Students

Joy Schaefer (Moderator)
Buzzy Hettleman
Richard Madaleno
Maggie McIntosh
Morgan Showalter
Alonzo Washington

Policy Area:

System that Ensures At-risk Students are Successful that supports these students and their families as soon as they arrive at school with both academic supports and extensive case management to address social, physical, mental and family needs to enable success at school
Element Detail 4a

**Element:** Add a concentrated poverty weight to the funding formula to support intensive services for students and their families to enable them to succeed in school, that are coordinated and able to meet the additional needs of students in schools located in distressed communities, with a higher tier of intensive case management services for traumatized students needing intensive, comprehensive services.

**Design Assumptions:**

**Overview:**

1. Maryland provides substantial funding for at-risk students through its compensatory education funding formula which many schools utilize to school funds for schools throughout the state to provide wraparound services to students in the school that need additional supports. However, top performing systems around the world provide additional funds to provide a greater degree of services for those students that are at the highest risk of not succeeding in school.

2. Adding a concentrated poverty weight will allow Maryland to provide funds to schools with high levels of poverty to enhance or establish programs and services to support the needs of most needy students in schools with high levels of poverty.

3. Funding should be provided to schools to implement or enhance a community school model that is based on a plan developed and submitted by an eligible school to meet the specific needs of the students at that school.

**Implementation Plans:**

3. Implementation plans should include but are not limited to:
   
a) A community based needs assessment process that is conducted in partnership with a local capacity building organization to develop an implementation strategy for addressing the needs of the students and their families and building on and strengthening community resources near the school;

   b) Ensuring that an experienced and qualified community schools coordinator at a vice principal level is hired;

   c) Inclusion of community partners in geographic proximity to the school who can assist in meeting the needs identified;
d) Ensuring that time is made available to train staff on the support offered, identifying the need for supports and how to engage with the community school coordinator in engaging with these supports.

e) Development of strategies to maximize external non-State or local education funding.

4. Broad strategies addressed in the implementation plan should include but are not limited to supporting:

a) Physical and behavioral health and wellness;

b) Family and community engagement and supports;

c) Extended learning time and tutoring services;

d) Early childhood development in elementary schools with linkages to Judy Centers serving families of children 0–5 who will attend the school;

e) Student enrichment experiences; and

f) Improvements to the learning environment at the school.

Funding:

5. Tiered levels of weight should be provided beginning with schools with 50% of students eligible for free and reduced price meals.

6. The additional weight for the tiers could be applied as follows (Note: this is a suggestion. It was not discussed fully)

a) 50% of the weight for schools with 50% of students eligible for free and reduced price meals

b) 75% of the weight for schools with 67% of students eligible for free and reduced price meals

c) 100% of the weight for schools with 75% or more of students eligible for free and reduced price meals

7. The additional weight should be applied and made available to schools that have a concentration population of students who have experienced trauma associated with conditions of extreme poverty who may need much more intensive health and behavioral health services.

a) This additional funding would be used to support services to diagnose and coordinate the services provided these high-need students, with a required implementation plan similar to that required for community schools.

b) Staff numbers and positions should be tiered in relation to school enrollment.
8. Funding would be based on eligibility after approval of an implementation plan.

9. Local school system must demonstrate that funds provided under the weight are being provided to the schools in which the weight is applicable and are being used for the purpose of implementing the approved community school plans.

10. Local governments would be expected to demonstrate support through meaningful partnership and support that is supplemental to and does not supplant existing efforts.

11. Partner agencies such as local management boards should participate at the State level and provide necessary funding and support to enable local agencies to participate as partnering organizations.

12. Accountability should focus on metrics that include, but are not limited to: successful implementation of the plan, number of students served and not served, time to receive services, attendance, enrichment opportunities, reduction in disciplinary actions, teacher self-efficacy, student and principal satisfaction, meaningful family involvement.

2. Schools with at least 75% of students at or below 185% of the federal poverty line (i.e. receiving a free or reduced price lunch) are required to establish a community school or enhance the services provided at an existing community school supported by additional State funds that will be distributed via a calculation (the concentration of poverty weight) so that every school receives a certain amount of funds.

3. This is NOT a competitive grant, but there are certain conditions required of schools to receive the funds.

4. All eligible schools must submit a plan of implementation.

5. Implementation plans will outline how districts schools will:
   a) Conduct a needs assessment in partnership with a local capacity building organization to figure out an effective strategy for addressing their needs based on the community resources near the school
   b) Hire an experienced and qualified community schools coordinator
c) Make time for training for staff by the capacity building organization in the supports offered by the partner agencies and how to engage with them.

d) In response to the needs assessment, pick a handful of community partners in geographic proximity to the school who can help them address the needs they have identified, with an expectation that all schools pursue the following broad strategies:

- Physical and behavioral mental health and wellness
- Family and community engagement
- Extended learning time and tutoring services for the neediest students in the school
- In the case of elementary schools, early childhood development, with linkages to Judy Centers serving families of children 0-5 who will go on to attend the school

6. Funds provided under this weight must include, but are not limited to be used to support the community schools strategy:

   a) The hiring of an experienced and qualified community schools coordinator at the vice principal level (approximately $100,000)

   b) Stipend for staff training costs

   c) Possibly some small amount of funding for services that are not donated or Medicaid or insurance reimbursable

   Local districts and schoolsgovernments would be expected to each contribute 25% of the funding, as they currently are in Baltimore, in order to give them an incentive to take the work seriously and demonstrate support through meaningful partnership and support.

7. Partner agencies should participate at the State level and provide necessary funding and support to enable local agencies to participate as partnering organizations.

8. There could be a State coordinating board that oversees this work and serves an accountability function. Government, philanthropy, state commissioners of health and education, and partner agencies should all participate at the state level and require their local agencies to participate with Community School programs.

9. Capacity building would ideally be a local responsibility, with each county responsible for designating an organization who can be responsible for this work.

10. Accountability should focus on metrics that include, but are not limited to: successful implementation of the plan, number of students served and not served, time to receive services, attendance, enrichment opportunities, reduction in disciplinary actions, teacher self-efficacy, student and principal satisfaction, meaningful family involvement.
11. Via the concentrated poverty weight, the State will offer additional funds for schools that have a population of students who have experienced trauma associated with conditions of extreme poverty who may need much more intensive health and mental behavioral health services. This additional funding would be used to support medically-trained staff to diagnose and ease manage these high-need students, with a required implementation plan similar to that required for community schools. Staff numbers and positions should be tiered in relation to school enrollment.

QUESTIONS:

1. What should the proxy for poverty be?
   a. FRPM (185% of FPL)
   b. FPL
   c. Disadvantaged Community
   d. Distressed Community
   e. Direct
2. Is how to identify students at risk
3. What is the tipping point for “concentrated” poverty
4. How to ensure parent engagement
5. How to ensure cultural competency in meeting student needs

Implementation Considerations:

1. Every year, districts will be required to report on their program and submit progress on indicators.
2. Failure to successfully utilize the funding provided through the weight should be addressed in the Governance and Accountability Element the Community Schools approach may prompt State intervention to ensure that funds are being spent appropriately.
3. Explore the option of different weights for different concentrations of poverty. There is concern with creating a “cliff effect” of just one set level of poverty.
4. Schools with a lower poverty threshold could still organize Community School programming using their 97% weight for compensatory funding.
5. Determine effect of direct certification when using FARM as the indicator for poverty.
6. Determine what should be included in accountability system for implementation (components listed in 6, for example, could be part of accountability measures.

5. For other workgroups:
   o Group 1: Early Childhood:
- Judy Centers – if linkages to Judy Centers required for concentrated poverty schools, the number/locations/access to them must expand.
- Incorporate Trauma Informed Practice; include education for guardians.
  - Group 2: High Quality Teachers & Leaders
    --- Training/education for teachers, principals regarding Community Schools should be a part of prep.
    --- Training/education on Trauma Informed Practice should be a part of teacher/principal prep
  4. Training/education in cultural competency should be a part of staff training and preparation

Potential Follow-up for June-July meeting

- Costing Issues
  - Identify costs of various iterations of community schools (using community schools that are successful)
    - Utilized costs available from the community schools groups
    - Examine information APA has already collected during adequacy study
  - Examine the differences in costs for different concentrations of poverty with varied weights perhaps starting at 50% and rising to 75%
  - Identify the services assumed in APA’s base and weights that may already cover some of these services.

- Data to gather
  - Free & Reduced Meal Participation
    - Free v. Reduced Participants
    - Dissagregated by student demographic
    - How are eligible, but non-participating students captured?
  - Information on what is included in APA’s at-risk estimates from 2002 and 2016
  - Examples of other states’ concentration factors (homeless students? Needed ACEs services?)
Element Detail 4b – MOVE TO FULL COMMISSION

Element: Train school staff in all schools to recognize mental health issues as well as other issues related to trauma and coordinate access to needed mental health and other services for students, as part of effort to increase school safety (see SB 1265—signed into law as Chapter 30)

Design Assumptions:

1. Staff in all schools will be trained to recognize student mental health issues, as well as students experiencing trauma or violence outside of school
2. Schools will organize response plans to ensure that all students are connected to mental health and other services, as needed
3. Schools will be required to develop partnerships with available community resources and experts in order to develop an active and comprehensive referral network
4. School staff will also be trained in protocols for how to support any student needing these services while he/she is enrolled in school

Implementation Considerations:

1. Staff will collect information on state models for this work, as there is work being done in several states, including Massachusetts and Oregon, to create “trauma-sensitive” schools
Element Detail 4c

Element: Revise funding formula weight for special education students

Design Assumptions:

1. State and federal law require school systems to identify, locate, and evaluate all students who have or are suspected of having disabilities and in need of special education and related services.
2. To ensure students are not misidentified as being disabled, the law defines a list of eligible disabilities and students must meet one of those criteria.
3. The timeline for identifying, locating and evaluating students for special education and related services is established in State and federal law and regulation. Parental consent is required for students to be evaluated. An Individualized Education Plan (IEP) must be developed within 30 days of the date a student is identified as a student with a disability.
4. Children should be identified for special educational needs as soon as they enter public school (at pre-K or K), at other points when they enter the school system, and at key developmental milestones, or if teachers think a screening is needed.
5. Any child identified with a severe physical or mental disability at pre-school or pre-K age should immediately be placed in early intervention services and an individualized plan should be developed.
6. Children with mild to moderate needs identified as soon as they enter public school should be offered support services and small group tutoring; the purpose is to determine which students need a one-time intervention to get to grade level and which students need ongoing support and what type.
7. The overall goal is to provide necessary supports as quickly as possible.
8. Differentiated weights are recommended in principle, but it is anticipated that the special education study required by HB 1415 will propose those weights. In the meantime, the Commission will propose a single placeholder weight.
9. Staffing requirements in preK-2nd grade that required certification in Special Education and literacy / reading.

Implementation Considerations:

1. Because a special education study required by HB 1415 is due by December 2019, the new weight may be revised again at that time; we anticipate that this study will recommend a differentiated weight at that time.
2. Review APA’s recommendations for special education weights against design assumptions.
3. Additional staff (both teachers and paraprofessionals) should be assigned to elementary and middle schools to flexibly provide supports identified by teachers. 

Follow up for June meeting

- **Costing issues**
  - Will multiple weights be used or just a single weight

- **Data to gather**
  - Examples of multiple weights used by other states
    - Information on APA’s figures from 2016
    - **Need to ensure language is consistent with requirements of IDEA and ESSA**
    - Do states have alternate standards for specific special education populations? Nevada is implementing/need to figure out what this costs

- **Invite area experts from MSDE, Disability Rights MD**
Element Detail 4d

Element: Revise funding formula weight for Limited English Proficiency students

Design Assumptions:

1. No recommendations about LEP in the Commission’s preliminary report specifically, although it does say to increase support for at-risk students, including special education, low-income and LEP

2. APA report recommends lowering the weight, while raising the base cost

Weight funding must include and be used to provide:
- Family / Parent support and classes
- Cost for translation and translations services
- Bilingual liaisons

3. EL teachers must have specialized training, have proficiency in the other language(s), and cultural competency.

Implementation Considerations:

1. Many of the recommendations for targeted and differentiated supports would broadly give LEP students more services

2. How does design align to requirements of State ESSA plan, particularly in terms of accountability, student exiting and services provided post-program exit?

3. Should certain services be required to be funded when a school’s percentage of LEP students reaches a certain threshold

Follow up for June meeting

- Examples of other states approaches to funding
- Information on the distribution of LEP WIDA levels by grade level in the state.
- Work Group 2: High Quality Teachers & Leaders should consider the specialized training in pedagogy and language needed for EL teachers.
Element: Intervention for all K–8th grade students identified as struggling learners.
Transition this role to school teachers as time is freed up and training is added to teacher prep; students who continue to need tutoring beyond third grade should be provided with this support [GV15, JS16].

Design Assumptions:

1. Identify interventions that are working and learn how those programs are designed and delivered; this will form basis of the groups design assumptions.
2. All K–8th grade students identified by teachers as needing literacy or numeracy support should be provided with intervention in small groups of students (a successful design will indicate proper ratios to effectively deliver to students)
3. The aim of the tutoring is to get the students on grade level before 3rd grade
4. Students can transition out of tutoring support as soon as it is determines they are ready
5. Students in upper elementary school who continue to need tutoring should continue to get these services

Implementation Considerations:

1. What is the phase–in period to full implementation?
   - Time needed to scale up training?
   - What is mix of tutors (certified, assistants, volunteers)?
   - What is ratio of tutors to students? Does this differ based on severity of learning gap?
   - During phase–up what is prioritized (i.e., by grade of student, by severity of learning gap, by subject matter)?
2. What is the average time a student will need tutoring?
   - Based on severity of learning gap? (i.e., PARCC 1 means x time for tutoring, PARCC 2 means y time for tutoring, etc.)
   - Learning gap measured by what (PARCC, KRA)?
   - Goal of tutoring, what is success? (i.e., PARCC 4 or 5)?
3. Subjects for which tutoring should be provided? Does this differ based on grade level of student?
4. Potential cost savings?
   - Savings in special education needs?
1.5. HB 1415, which authorizes funding for evidence-based early literacy intervention in grades K-8 with a priority for K-3rd graders, in a school with a high concentration of students living in poverty has been enacted, so implementation of reading tutors will likely begin this year. The bill mandates $2.5 million in each of fiscal 2019 through 2022 for the program.

6. HB 1415 funding expires after fiscal 2022, with a requirement to evaluate the effectiveness of the program at that time. Because tutors are considered a transitional program, needed until teachers have time and capacity to provide this support themselves, it is not anticipated that funding will be renewed.

7. For Workgroup 2: High Quality Teachers and Leaders: Consider teaching experience or success in interventions with struggling learners as part of the state career ladder.

2.8. For Workgroup 2: High Quality Teachers and Leaders: Require teachers in prep programs, beginning in SY19-20, to pass the “Foundations of Teaching Reading(?) as part of General Education certification requirements.

Other Options:

1. Current legislation (HB 1415) funds reading tutors; could expand to include math tutors as well
2. Many students should be able to transition from tutoring by 3rd grade
3. As expertise in diagnosing and supporting learning difficulties is added to teacher preparation and schools are organized in ways to allow teachers time to provide this support directly, this activity can be phased out

Follow up for June meeting

- Costing issues
  - Need to identify evidence-based models for tutoring interventions
Working Group 3 Version

Element Detail 3c — as revised by Working Group 3 at their June 21 meeting

**Element:** Commission’s Preliminary Report calls for the reorganization of schools so that teachers trained to diagnose and address students learning needs can work collaboratively to monitor students and intervene when a student is struggling. Teachers would meet regularly to monitor student progress, decide on an intervention — academic or referral to services — and assign a single teacher to take responsibility for following the student until he or she is back on track. (See Working Group 2 elements)

As it will take several years to put this system in place, it will be necessary to develop a transitional program to address the needs of struggling learnings. This will be a **tutoring program** for all K-3rd grade students identified as needing support. Students who continue to need tutoring beyond 3rd grade should be provided with this support. Over time, the role of tutoring and monitoring students will be assigned to regular teachers as their time is freed up to do this work and they are trained in diagnosing and addressing learning difficulties. [Note: Suggest to WG #2 that they include teacher PD and sufficient time in the school day for this purpose]

[Just as the Commission’s Interim Report proposed several measures to greatly reduce the proportion of students falling behind, it also proposed measures for enriching the curriculum for students who need and could benefit from challenges that go beyond the standard curriculum. Those challenges will be provided not by accelerating their curriculum, but by enriching or deepening it. But here, as in the case of students falling behind as they go through school, it will take time to put that curriculum in place for all the students who could benefit from it. In the meantime, the supports now provided for students identified as gifted and talented should continue to be provided. [This needs to be “meatier” for the purpose of serving advanced learners. What is currently being done is not enough (Finn).] There is ongoing discussion about this paragraph.]

**Design Assumptions for Transitional Program:**
1. All K-3rd grade students identified by teachers as needing literacy or numeracy support should be provided with tutoring in small groups of students.

2. The aim of the tutoring is to get the students on grade level before 3rd grade proficient at every grade level.

3. Students will transition out of tutoring support as soon as their teacher determines they are ready.

4. Students in upper elementary school who continue to need tutoring should continue to get these services.

5. Tutors should be trained reading and math specialists.

6. As a new system is implemented, school leaders and teachers should be trained in new approach to supporting students. This will involve three strands of training: training for school leaders on the system of supports; training for veteran teachers in schools; and training for new teachers in teacher prep institutions on the pedagogy as well as the new system.

7. The special education system would remain in place for students with disabilities, but as more students are supported early, fewer students will be referred for special education services.

Implementation Considerations:

1. HB 1415 (Chapter 361) authorizes funding for evidence–based early literacy intervention in grades K-8 with a priority for K-3rd graders in a school with a high concentration of students living in poverty. The bill mandates $2.5 million in each of fiscal 2019 through 2022 for the program.

2. HB 1415 funding expires after fiscal 2022, with a requirement to evaluate the effectiveness of the program at that time. Because tutors are considered a transitional program, needed until teachers have time and capacity to provide this support themselves, it is not anticipated that funding will be renewed.

Other Options:

1. Current legislation (HB 1415) funds reading tutors; could expand to include math tutors as well.

2. Many students should be able to transition from tutoring by 3rd grade.

3. As expertise in diagnosing and supporting learning difficulties is added to teacher preparation and schools are organized in ways to allow teachers time to provide this support directly, this activity can be phased out.
