

## Preliminary Fiscal 2030 Progressivity Estimates

	Local			State			State & Local		
	<u>Current Law</u>	<u>Proposal</u>	<u>% Diff.</u>	<u>Current Law</u>	<u>Proposal</u>	<u>% Diff.</u>	<u>Current Law</u>	<u>Proposal</u>	<u>% Diff.</u>
Progressivity Index	0.849	0.944	11%	1.194	1.242	4%	1.011	1.098	9%
Funding Difference	-\$1,456	-\$591	\$865	\$1,648	\$2,748	\$1,100	\$192	\$2,157	\$1,965

Progressivity measures are Department of Legislative Services figures that are intended to be similar to the Urban Institute method, results of which were presented to the Commission on June 28, 2017.

The index indicates the ratio of spending on students who are from low-income families to spending on students who are not from low-income families, as indicated by free and reduced-price meal eligibility.

Results below 1.0 indicate regressivity; results above 1.0 indicate progressivity.

Funding difference indicates the degree to which per pupil funding for students in low-income families is above or below that for students not from low-income families.

Under the proposal, local funding for each county is assumed to be the greater of the proposed local share of the wealth-equalized formulas and the projected local appropriation.
