

State Aid to Washington County

Fiscal 2027

State Aid Overview

- Washington County will receive \$342.1 million in State aid in fiscal 2027. Of this amount, \$317.5 million is direct aid, and \$24.6 million is for retirement payments.
- Washington County will receive a 3.6% increase in State funding in fiscal 2027, with total State aid increasing by \$11.9 million over the prior year. Direct aid increases by \$11.1 million, while retirement payments increase by \$0.8 million.
- The vast majority of this funding is targeted to the public school system, which receives 87.8% of the total State aid provided to Washington County. The community college system receives 6.5%, and county and municipal governments receive 3.8%.

County-Municipal Aid

- Washington County will receive \$12.9 million in county-municipal aid, which represents a \$0.2 million, or 1.7%, decrease from the prior year.
- State funding includes \$7.4 million for highway user revenues (HURs), \$2.4 million for police aid, and \$0.4 million for fire and rescue aid. The decrease in annual funding is due to the completion of a \$250,000 one-time grant to the City of Hagerstown to conduct an infrastructure study.

Public Safety Grants

- Washington County will receive \$1.5 million in funding under the existing police aid formula, and \$0.9 million in enhanced funding based on the number of violent crime offenses occurring within the county.
- The fiscal 2027 allocation for the police aid enhancement was not updated to reflect the most recent uniform crime data for calendar 2024. Each jurisdiction receives the same allocation as in the prior year, except for Baltimore City which receives an additional \$1.25 million in funding. The use of prior year uniform crime data for calendar 2023 results in a larger funding allocation of \$96,500 for Washington County, which experienced a greater overall reduction in violent crime offenses in 2024. Allegany and Garrett counties also benefit from using the prior year uniform crime data.

- The majority of State funding under the police aid formula is based on population density. More urbanized jurisdictions with a higher population density receive a higher per capita grant amount. A small component of the formula (representing 4.3% of overall funding) targets funding to municipalities based on the number of sworn officers. Funding in fiscal 2027 is based on \$1,950 per sworn officer.
- Since fiscal 2004, local governments must reimburse the State for 30% of the State Police crime lab costs, which will total \$5.9 million in fiscal 2027. The reimbursements are based on local crime rates (one-third) and local wealth (two-thirds). The Washington County share of these costs will total \$101,447 in fiscal 2027. The local reimbursement is deducted from each jurisdiction's police aid amount.
- Washington County will receive \$369,100 in fire and rescue aid in fiscal 2027. Each county's funding is based on their share of property tax accounts relative to the statewide total. Each county is guaranteed a minimum 2% share of total funds (\$330,000).

Transportation Aid

- Washington County will receive \$7.4 million in local highway user revenues (HURs) in fiscal 2027, which is almost level funded from the prior year. The county and municipal share is based on road mileage and vehicle registration. In fiscal 2027, the Washington County government will receive \$3.4 million, and the municipalities will receive \$4.0 million in HURs.
- Local transportation funding did not benefit from the legislative actions taken at the 2025 session, since the additional revenues from the higher transportation taxes and fees were targeted to State projects and were not shared with local governments through the HURs program.
- State funding for local HURs is based on the amount of revenue allocated to the Gasoline and Motor Vehicle Revenue Account (GMVRA). In fiscal 2027, State funding to local governments is based on 20% of total GMVRA revenues. Of this amount:
 - 61% goes to Baltimore City (12.2% of GMVRA);
 - 24% goes to county governments (4.8% of GMVRA); and
 - 15% goes to municipalities (3.0% of GMVRA).
- Under current law, these distributions will decrease beginning in fiscal 2028, when the allocations revert to the fiscal 2024 distribution, as shown in the following table. Based on the current transportation revenue forecast, this provision will result in a \$1.5 million reduction in local HURs for the county in fiscal 2028, compared to current funding levels.

Local Share of Highway User Revenues

	<u>FY 23</u>	<u>FY 24</u>	<u>FY 25</u>	<u>FY 26</u>	<u>FY 27</u>
MDOT	86.5%	84.4%	82.0%	80.0%	80.0%
Baltimore City	8.3%	9.5%	11.0%	12.2%	12.2%
Counties	3.2%	3.7%	4.3%	4.8%	4.8%
Municipalities	2.0%	2.4%	2.7%	3.0%	3.0%

MDOT: Maryland Department of Transportation

Local Health Grants

- Washington County will receive \$4.4 million in local health grants in fiscal 2027, a \$51,200 or 1.1% decrease from the prior year.
- Local health grants for most counties include two components: mandated aid under the core funding formula that is adjusted annually for population growth and inflation; and discretionary aid to cover salary adjustments for State employees within the local health departments. In Washington County, the local health department is staffed by State employees and therefore the county receives funding under both components.
- With the overall funding amount for local health departments remaining unchanged from the prior year and with higher costs to fund the mandated core funding formula, salary funding for most counties will be reduced in fiscal 2027. In fact, only five local health departments will receive an increase in funding, with most local health departments, particularly in rural areas, realizing annual decreases of over 10%.

Disparity Grants

- Washington County will receive \$2.5 million in disparity grant funding in fiscal 2027, which is equal to the amount of funding received in the prior year due to the Governor's proposal.
- The Budget Reconciliation and Financing Act (BRFA) level funds the disparity grant program at the fiscal 2026 formula amount of \$176.6 million through fiscal 2029, resulting in a \$17.1 million reduction (8.8% decrease) in fiscal 2027 compared to the enhanced fiscal 2026 level and a \$27.0 million reduction compared to the formula-required amount of \$203.6 million.

- Prince George’s County faces the largest reduction at \$17.5 million, followed by Allegany County at \$6.3 million. Washington County will realize a \$316,408 reduction in funding in fiscal 2027 compared to the statutory funding amount.

Local Library and Community College Aid

- Washington County will receive \$1.7 million in local library aid, and \$20.4 million in State support for the local community college.
- The BRFA includes a provision that limits the annual increase in State funding under the Cade funding formula to 3%. Since Hagerstown Community College is expected to realize a 3.0% decrease in Cade formula aid under current law due to a projected decrease in student enrollment, the county is not affected by this proposed reduction.

Education Aid

- The vast majority of State funding is targeted to the public school system. Direct State aid to the Washington County Public School System accounts for 81.3% of total State aid provided to the county; and funding for teacher retirement accounts for 6.5% of total State aid.
- In fiscal 2027, the Washington County Public School System will receive \$278.1 million in direct aid, which represents a \$12.0 million, or 4.5%, increase from the prior year. In addition, the State will provide \$22.1 million in funding for teacher retirement payments.
- On a per pupil basis, Washington County will receive \$13,954 in State funding: \$12,928 per pupil in direct aid; and \$1,026 per pupil for teacher retirement payments.
- Washington County will receive a 4.9% increase in per pupil direct aid in fiscal 2027. This is above the statewide average increase of 4.6%. The higher per pupil increase in Washington County is partly due to a below average decrease in student enrollment.

Administration Proposal

- The proposed fiscal 2027 State budget includes \$228.4 million in funding enhancements for three formula aid programs due to the implementation of a revised student enrollment count for students approved for free and reduced-price meals (FRPM). This will affect State funding under the compensatory aid, concentration of poverty, and education effort adjustment. This change will provide an additional \$5.0 million in State funding to Washington County over statutory funding amounts.

- State funding for compensatory aid and concentration of poverty is partly based on the number of students approved for FRPM. Until fiscal 2027, the FRPM count included a hold harmless provision for local school systems participating in the federal community eligibility provision (CEP). The hold harmless provision prevents the FRPM count for CEP schools/school systems (as measured by the percentage of FRPM students to total enrollment) from falling below the percentage of FRPM students to total enrollment in the year prior to CEP participation. The Governor proposes to extend this hold harmless provision for fiscal 2027.
- This proposal will increase the FRPM count for fiscal 2027 funding purposes by 33,564 students. Instead of a 9.4% statewide decrease in the FRPM count from the fiscal 2026 funding level, the decrease is limited to 1.7%. In Washington County, this proposal will limit the annual decrease in the FRPM count to only 2.3% instead of 9.3%. This represents an additional 920 students or 2.7% of the total statewide share. Three local school systems account for most of the additional FRPM students: Baltimore City (40%); Montgomery County (16%); and Prince George’s County (23%).
- The Administration proposes to shift one-half of the annual increase in State retirement payments for teachers, librarians, and community college faculty to county governments (including Baltimore City). This State-local cost shift will total \$39.3 million statewide in fiscal 2027, with the Washington County share totaling \$882,000.

Blueprint and Targeted Funding

- Washington County will receive \$32.2 million in State funding under the Blueprint Initiatives in fiscal 2027. This includes \$17.5 million in concentration of poverty grants, \$11.6 million for full-day prekindergarten, and \$1.3 million for college and career programs.
- A considerable amount of State education funding is based on targeted student populations, with Washington County receiving \$92.0 million in targeted grants under the compensatory aid, English Language Learners (ELL), and special education programs. Of these three programs, Washington County receives \$62.6 million in compensatory aid funding, \$21.9 million in special education funding, and \$7.5 million in ELL grants.

Local Wealth

- Washington County has the sixth lowest per pupil wealth measure in the State, at 70% of the statewide average. The local wealth measure is a combination of property wealth, as measured by the county assessable base, and income wealth as measured by net taxable income. In terms of local property wealth, Washington County has the sixth lowest per pupil wealth at 73% of the statewide average. In terms of local income wealth, Washington County also has the sixth lowest per pupil wealth, at 66% of the statewide average.

Student Enrollment

- Washington County's full-time equivalent student (FTES) enrollment count decreases by 0.3%, compared to a statewide average decline of 0.9%. Only three local school systems experience an increase in their FTES enrollment this year. Currently, the Washington County School System has around 21,500 public school students, which accounts for 2.5% of students statewide.
- The number of students approved for FRPM decreases by 2.3% in Washington County, which is above the statewide average decrease of 1.7%. Washington County currently has an above average percentage of students approved for FRPM at 59.6% of total student enrollment. Statewide, over half of the students are approved for FRPM, and this ranges from around 27.8% in Calvert County to almost 90% in Baltimore City.
- Washington County has a below average percentage of students identified as English Language Learners (ELL) at 5.7% of total student enrollment. In fiscal 2027, the number of ELL students increases by 0.9%, resulting in 11 additional students requiring language services. Statewide, the number of ELL students enrolled during the 2025 school year has decreased by 3.6%, with only five local school systems reporting an increase in the number of ELL students.
- Washington County has a below average share of students receiving special education services at 14.1% of total enrollment. This compares to the statewide average of 14.6%. The number of students receiving special education services increases by 2.9% this year, slightly above the statewide average increase of 2.0%.
- The targeted student index measures the percentage share of a school system's student enrollment approved for FRPM, ELL, and special education services. While Washington County has an average targeted student index of 79.4%, a significant portion of the county's public school students has been identified as needing additional educational services to meet academic performance standards. The targeted student index ranges from 41.6% in Calvert County to 118.0% in Baltimore City, with the statewide average at 79.1%.
- Statewide, public school enrollment represents 13.5% of the total State population. In Washington County, public school enrollment represents 13.7% of the overall county population (the tenth highest share in the State). In comparison, Kent County has the lowest share, with public school enrollment accounting for 8.2% of the total county population while Howard County has the highest share at 16.3%.
