Mandated Appropriations in the Maryland State Budget

Department of Legislative Services Office of Policy Analysis Annapolis, Maryland

December 2023

Mandated Appropriations in the Maryland State Budget

A constitutional amendment enacted in 1978 allowed the General Assembly to require the Governor to include a minimum level of funding for a program in a future budget. Since the constitutional amendment, the use of funding mandates has grown significantly, as mandated spending gives the legislature a stronger role in priority setting and fiscal policy formulation and increases the ability to protect agencies and interests. The definition of a mandated appropriation was further clarified by the Attorney General's opinion of Chapter 851 of 1980, which is that a statutory mandate must clearly prescribe a dollar amount or an objective basis from which a level of funding can easily be computed.

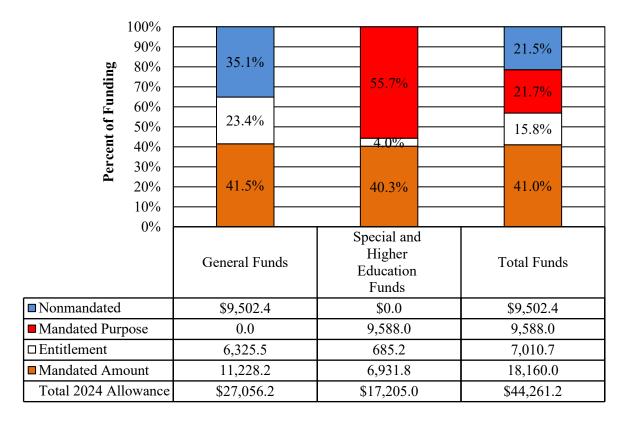

Although federal funds may be used to meet spending mandates and support entitlement programs, the focus of this report is on State-sourced funding (general and special funds). For purposes of the report, spending is categorized as:

- *Mandated Amounts:* General or special funds that have a statutory or constitutional requirement that designates a specific amount be appropriated or a specific formula be used to calculate an appropriation.
- Entitlements: General or special funds that have a statutory or constitutional requirement that designates certain benefits to all individuals or groups that meet eligibility criteria. In contrast to mandated amounts, the Governor has some flexibility to adjust funding for entitlements. For example, some Medical Care Program Administration (Medicaid) provider payment rates can be reduced without a law change.
- **Funds with Mandated Purposes:** Special and higher education funds that have statutory dedications identifying a broad purpose for the funds but that allow the Governor discretion on how much funding is appropriated and as to how the funds are allocated and used.
- Nonmandated Funds: General funds that allow the Governor substantial flexibility as to the administration and funding levels of the programs with which they are associated. In many cases, State law requires expenditures for these programs without specifically mandating the amount or purpose. For the purposes of this report, the Reserve Fund appropriation is considered nonmandated spending. Although appropriations to the Reserve Fund are based on a statutory formula, the amount of appropriation is reliant on the availability of excess revenues at year-end closeout, which can vary significantly from year to year and represent the appropriation of funds held in an account for future use, as opposed to actual expenditures. Expenditures out of the Reserve Fund supporting mandates or entitlement programs would be captured in those categories of spending.

The State's own-source budget totals \$44.3 billion for fiscal 2024. Altogether, proposed fiscal 2024 appropriations with a mandated amount total \$18.2 billion, and entitlements total an additional \$7.0 billion for a combined 56.9% of the State-sourced portion of the budget.

From fiscal 2014 through 2024, spending on mandates and entitlements has ranged from a low of 50% of the State-sourced portion of the budget in fiscal 2015 to a high of 56.9% in fiscal 2024. The main drivers of these expenditures are education- and health-related; these two categories have ranged from a low of 62.3% in fiscal 2023 to a high of 73.1% in fiscal 2015 of the State-sourced mandated and entitlement spending, as shown in **Appendix 1**. The current proportion is the second lowest share seen during this time period and is largely caused by an increase in mandated State transportation spending. As shown in **Exhibit 1**, 64.9% of the fiscal 2024 general fund allowance and 44.3% of the special fund and higher education allowance are mandates or entitlements. The remaining 55.7% of the special fund and higher education allowance is dedicated for specific purposes defined statutorily.

Exhibit 1
Maryland State Spending from Own-source Budget as
Included in the Fiscal 2024 Allowance
(\$ in Millions)

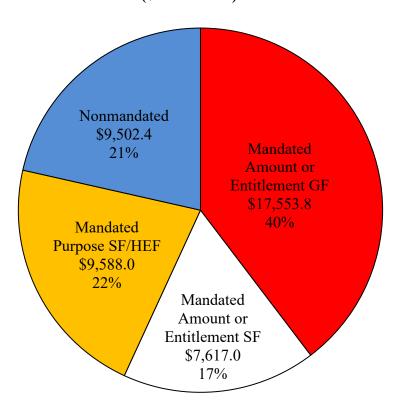

Note: Numbers may not sum to total due to rounding. Fiscal 2024 special and higher education funds exclude the general and special fund portions of current unrestricted funds.

Source: Governor's Fiscal 2024 Budget Books; Department of Legislative Services

Exhibit 2 shows the distribution of mandates, entitlements, funds with mandated purposes, and nonmandated funds as a percent of State-sourced spending. Approximately one-fifth of State-sourced spending in fiscal 2024 is available for discretionary appropriations, a large portion of which includes funding for State employee personnel expenses, operation of the adult correctional system, and other core government functions.

Exhibit 2

Exhibit 3 shows that allowances for higher education, public safety, and health account for 58.1% of the nonmandated general funds. The State Reserve Fund allowance accounts for an additional 16.5% of fiscal 2024 nonmandated general funds.

Exhibit 3
Detailed General Fund Spending from
Own-source Budget on Nonmandated Items

MSP: Maryland State Police

Exhibit 4 illustrates that K-12 education and health programs receive a combined 77.0% of all mandated general fund spending in the allowance. Transportation, education, and debt service for the State's capital program account for 80.5% of all special fund mandates in the allowance.

The 21 general fund programs that have mandates or entitlements exceeding \$100 million account for 89.8% of all general fund mandated spending, as shown in **Exhibit 5**. Funding for the 2 largest mandated or entitlement general fund programs, the Foundation Program and Medicaid, account for 44.6% of all general fund spending for mandates and entitlements. With respect to special and higher education funds, 16 programs exceeded \$100 million, totaling 85.1% of all mandated special fund and higher education spending.

When considering who benefits from mandated appropriations and entitlement programs, **Exhibit 6** demonstrates that 69.5% of all general and special fund mandates are received by units of local government or individuals. Local governments receive substantial general fund amounts for K-12 education, while individuals primarily receive general-funded health services. Individuals are the second largest recipient of general fund mandated spending, largely due to the Medicaid program.

Approximately \$4.5 billion, or 17.8%, of the allowance's general and special fund mandated spending is directed toward State government functions. The largest general fund appropriation for State government functions is the Judicial Branch, followed by the State employee retirement contribution. State and local government functions account for the largest portion of mandated special fund and higher education spending in the fiscal 2024 allowance, receiving approximately 32.5% and 26.2% of funding, respectively. Spending for mandates or entitlements in the fiscal 2024 allowance by recipient type is shown in **Appendix 2** for general funds and **Appendix 3** for special funds.

Although the legislature cannot mandate general obligation (GO) bond authorizations, it has become common practice to mandate general fund pay-as-you-go (PAYGO) capital spending with the stipulation that the Governor can fund the project or program with GO debt. As shown in **Exhibit 7**, \$25.7 million of these PAYGO general fund mandates were funded through GO authorizations in the capital budget bill. Had the Governor chosen not to use GO debt, then this

amount would have had to have been included in the fiscal 2024 allowance, which would have increased the sum of mandated appropriations.

While mandates require a certain level of spending, the Governor has the authority to spend more on a program than the designated mandate amount. Due to the availability of significant cash resources and reflective of negotiations between the legislature and the Administration to fund specific priorities, as **Exhibit 8** shows, 41 programs received more funding in fiscal 2024 than required by law, by a total of \$1.1 billion. The operating subsidies for transportation increased substantially in fiscal 2024, accounting for 73.0% of these additional monies.

Ten programs were underfunded relative to their mandated spending level. The total amount of funds below the mandate reached \$8.5 million for these programs. The majority were righted in the legislative appropriation by legislative action or supplemental budgets, but the delayed Baltimore Convention Facility Renovation project is a notable mandate that lacks fiscal 2024 funding.
